Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

1. Information Disclosure Statement filed on 2/13/04 has been received.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4,7 are rejected under 35 U.S.C. 102(b) as being anticipated by Beck (US 2001/0032462.

Outer tube unnumbered but outmost tube, inner tube 13, reservoir 2, damping piston 16, piston rod 14, pump piston 7, inflow 10 and outflow 11 lines, base unnumbered but connects pump housing 22 to outer tube. The pump is connected to the base member while the pump is one of two operable positions 1) the piston 7 is fully retracted and 2) the piston is fully extended. The examiner notes that the claims state the pump is connected to NOT mounted to the base.

4. Claims 1- 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Duckett (U. S. Patent no. 3,945,663).

Outer tube 2, inner tube 1, reservoir 7, damping piston 16, piston rod 14, pump piston 7, inflow and outflow lines 6, base 27 with threaded connections 23. The pump is

connected to the base member at one connection 23 while the other is sealed off by plug 31.

The examiner notes that the claims state the pump is connected to NOT mounted to the base.

In order to advance prosecution, the examiner makes the following rejection based on the pump being mounted to the base and not merely connected. The claims as currently written do not require this but it is what the applicant has disclosed.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beck in view of Beck et al (U. S. Patent no. 6,494,441).

Beck is relied upon as above. Beck does not disclose mounting the pump in more than one operative position. Beck et al teaches that the pump can be mounted in more than one position (see figures 1 and 2). It would have been obvious to one of ordinary skill in the art at the time the invention was made to mount the pump in more than one position
